

Productivity Simplified

Perhaps the greatest challenge to advancing technology is to simplify its use. This has been our overriding objective as we have virtually rewritten the rules for mail processing. The result ... DM Series of Digitally Networked Mailing System.

Mail is a crucial element for growing your business and retaining your hard-earned customers and it's a proven tool for acquiring new ones. Mail is a critical communication tool that can't be overlooked, and that's why we've developed an entirely new family of simple yet productive mailing systems.

The DM Series delivers this promise, complies with present and future postal regulations, and it introduces our revolutionary IntelliLink® Technology – your electronic gateway to a host of networked services. So whether you're looking for an entry level or fully featured system, the DM Series can meet your needs. It's the reward you receive when you dare to simplify.

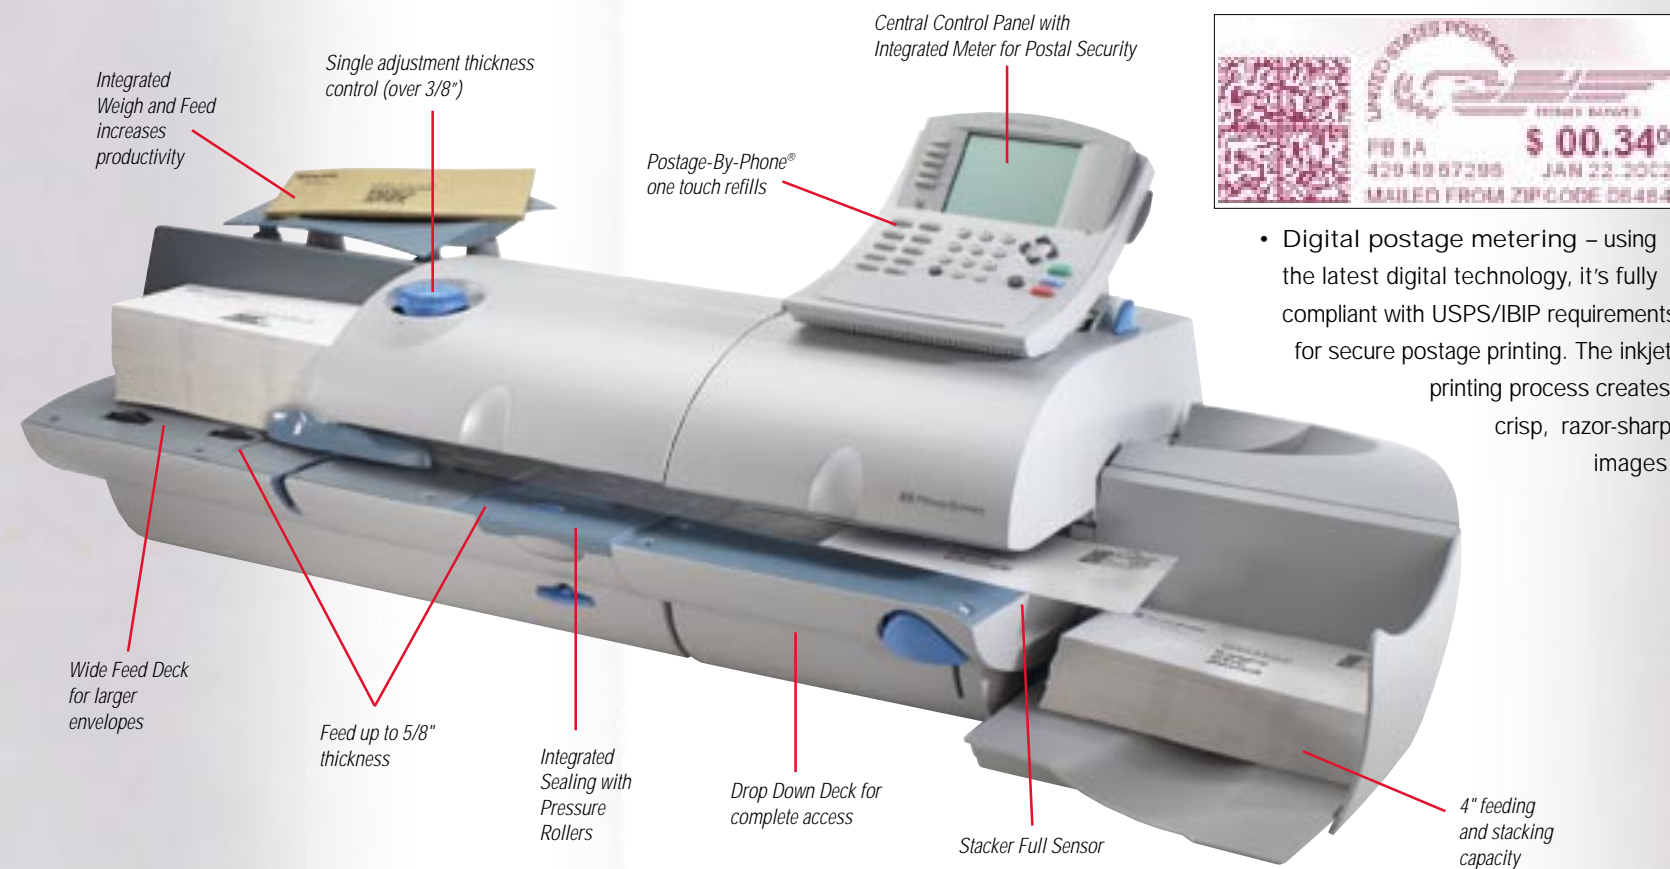

The DM550 Mailing System Takes Productivity, Durability, And Ease To A New Plateau!

Built for solid performance and greater productivity... plus.

- Streamlined processing – The DM550 is more than able to meet the daily demands of virtually any mid-volume mailer with automatic feeding, sealing, metering and stacking at up to 160 envelopes per minute.
- Versatile feeding – thickness and size adjustments are minimized and productivity is enhanced by the DM550's ability to feed various sized envelopes. Quickly feed up to 5/8" thick mail and varying sizes from post cards to 10" x 13" envelopes.

- Integrated Weigh and Feed – increases productivity by combining the power of the integrated platform with mixed thickness capabilities. Differential weighing will calculate the postage rate as the mail is removed from the scale. The meter sets automatically ... just remove and feed.
- Self-aligning feed system – envelopes are fed straighter to protect envelope contents and to ensure more efficient feeding. Extraordinary features include auto-on sensor, alignment feed rollers, anti-skew sensors, and double feed protection.

Easy enough for anyone to use.

- Central Control Panel – all of the system's functions are activated and controlled from a single point, making the overall operation easy and your job completed faster.

- Simplified rating – all rate selections are simply made through the Central Control Panel and updated automatically via IntelliLink®. The DM550's weighing options always include both USPS Domestic and International rates.
- Easy to follow prompts – these clear instructions guide the most casual operator thru the necessary steps to get the mail out. The Central Control Panel provides single view selection of the system set-up, accounting, rating, and processing functions.

- Digital postage metering – using the latest digital technology, it's fully compliant with USPS/IBIP requirements for secure postage printing. The inkjet printing process creates crisp, razor-sharp images.

Finish the job quickly and accurately.

- Standard 25-account package – the system tracks and displays expenses for up to 25 accounts. Built-in keypad allows full naming of accounts and speed codes provide for quick selection.
- Expanded accounting – increase your account capacity and expand your reporting capabilities. Options include, expanded memory, PC interface or a Report Printer.
- Ten job presets – enables even inexperienced operators to easily run the routine jobs stored in memory.

Productive Features

Drop-In Roll Tape – Self-adhesive roll tape that's quick and easy to replace, and dispenses cut to size tapes to eliminate waste.

Drop Down Deck – Simplified access to the entire feed path will assure you that your envelopes and contents are fully protected.

Secure Sealing – Tip-to-tip sealing protects contents of the envelope. Pressure rollers and transport rollers work together to provide a positive seal.

Platform Options – Configure the best system by choosing from the 5 lb. Integrated Platform, or four interfaced platform options with maximum capacities of 15 lb., 30 lb., 70 lb., and 150 lbs.

IntelliLink® ... the intelligence that keeps you connected and current.

Imagine having an electronic gateway to Pitney Bowes and the Postal Service. That's what IntelliLink® Technology can mean for you. Just connect your system to an analog phone line; everything else is automatic.

No more rate chips to change! IntelliLink® delivers postal rate increases and class changes directly to your system ... automatically.

Easy access to tracking services and discounted postal rates! IntelliLink® provides access to the Confirmation Services option for Internet tracking for Delivery & Signature Confirmation, and Certified Mail. A great way to reduce express carrier costs.

Refill your meter with one touch of a button! IntelliLink® allows simple one touch meter resetting, giving you 24 hour access – 7 days per week – to your Postage by Phone® account.

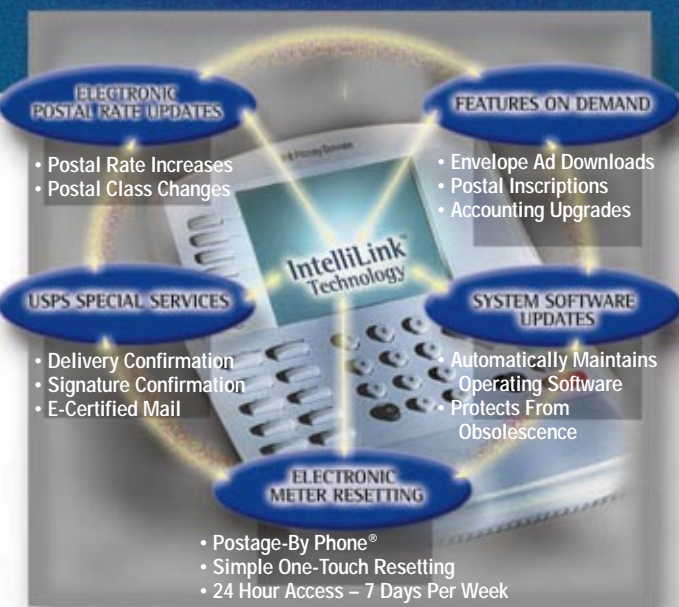

Feature upgrades without a service visit or equipment change! New features can be downloaded directly to your system like accounting upgrades, envelope advertisements and postal inscriptions.

System Software updated electronically! IntelliLink® automatically maintains your system with the very latest operating software. This keeps you current, minimizes downtime, and importantly, protects you from obsolescence.

DM550 SPECIFICATIONS

Introducing IntelliLink® Technology

No more rate chips, confirm your deliveries, stay current and save money.

DM550™ Specifications

Dimensions/Sound

(including stacker)
35"L x 19" D x 14"H
